

HYGIENE SET FOR SUPPORTS AND ORTHOSES

The best way for patients to see the effect and fit of our products themselves, is to try them on when visiting a medical supply retailer. To ensure ideal service, we are now offering a hygiene set with liner stockings to our customers.

RETAILER BENEFITS

The patient as well as the product are suitably protected when the patient tries something on. Skin flakes or hair cannot get caught in the knitted fabric or on the surfaces. This means: No problems with restocking or the return of models that were ordered for the size selection of a product. Patients do not have to worry when trying on products, thanks to better health protection, particularly now during the pandemic.

The hygiene liner stockings are suitable for trying on our supports and orthoses for elbows, knees, and feet. They are elastic, made of breathable material, and knitted without a foot section.

For reasons of sustainability, the stockings are not disposable products; instead, they can be cleaned at 60 °C and then reused. The mesh bag supplied prevents the knitted fabric from being damaged in the wash.

THE HYGIENE SET CONSISTS OF:

- + 10 white liner stockings in a universal size
- + a mesh bag
- + an insert with donning tips and washing instructions

The set is available to order under item number 191 0006 0001 020 for €27.00.
